

NETHMI SADEESHA

nethmisadeesha2002@gmail.com

Malabe, Colombo, Sri Lanka

Date of birth : 2002.12.03

0770894978

LinkedIn : [linkedin.com/in/nethmi-sadeesha-3a9266399](https://www.linkedin.com/in/nethmi-sadeesha-3a9266399)

GitHub : <https://github.com/NSadeesha>

Motivated third-year Software Engineering undergraduate at SLIIT with a strong interest in Software Quality Assurance and Test Automation. Familiar with manual testing, test case design, bug reporting, API testing using Postman, and automated testing using Selenium, Playwright and JUnit. Experienced in developing and validating web applications through academic projects using Java, JavaScript, MERN Stack, SQL, and GitHub. Strong analytical and problem-solving skills with a passion for delivering high-quality software and continuously learning modern QA practices and tools.

SKILLS

QA & Testing

Manual Testing, Test Case Design, Bug Reporting, Functional Testing, Regression Testing, API Testing (Postman), Selenium, JUnit, Playwright, Jira

Programming Languages

Python, Java, JavaScript, Kotlin, PHP, C, C++, R

Technical Skills

Web Development: React, Express.js, HTML, XML, Node.js, MongoDB, CSS, Tailwind CSS

Frameworks: React.js, MERN, .NET, Express.js, Node.js

Mobile Development: Android Studio, Figma

Databases: SQL, MongoDB

Tools and Platforms: GitHub, Git, Jira, VS Code, Visual Studio, Android Studio, Postman, JUnit, Selenium, Playwright, SQL Workbench, Docker, Kubernetes

Soft Skill

- Strong organizational skills
 - Excellent communication skills, developed through presentations and team collaboration.
 - Critical thinker with the ability to analyze complex problems and devise effective solutions.
-

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT)

- BSc (Hons) Information Technology specializing in Software Engineering
- Third-Year Student Expected Graduation: 2027

Southlands College, Galle, Sri Lanka

- GCE Advanced Level Examinations (GCE A/L) in Physical Science Stream (3S)

British Way English Academy

- Advanced Certificate
-

PROJECTS

- **MEDIGO – Healthcare Management Microservices System**

Technologies Used: MERN Stack (MongoDB, Express.js, React.js, Node.js), Docker, Kubernetes, Nginx, JWT Authentication, Postman, GitHub

Developed the Doctor Management Service of a healthcare management system built using a microservices architecture. Performed API testing using Postman, validated system functionality, and participated in debugging to ensure reliable service performance. Collaborated with team members using GitHub and followed Agile development practices.

- **EnergyMate – Smart Household Energy Management System**

Technologies Used: MERN Stack (MongoDB, Express.js, React.js, Node.js), JWT Authentication, Postman, GitHub

Developed and tested the Household Management, Feedback, and Support Ticket modules of a MERN-based Smart Household Energy Management System. Implemented frontend and backend functionalities, RESTful APIs, CRUD operations, and JWT authentication while conducting API testing using Postman, unit testing, frontend testing, and functionality validation. Collaborated with team members using GitHub throughout development and testing.

- **Driving School Management System(ITP)**

Technologies Used: MERN Stack (MongoDB, Express.js, React, Node.js)

Developed a Driving School Management System using the MERN Stack to manage student registration, lesson scheduling, vehicle assignments, and instructor management. Implemented frontend and backend functionalities, secure authentication, and responsive user interfaces while performing functionality testing and validation to ensure system reliability.

- **Inventory Management System(OOP)**

Technologies Used: Java, MySQL, HTML, CSS, JavaScript

Developed a web-based Inventory Management System to efficiently manage stock and products. Implemented features for adding, updating, and deleting items, tracking quantities, managing prices, and searching/filtering products, with a user-friendly interface for easy access and operations
